

MME Seminar 2017

Session 5

The Research on Teachers' in-the-moment decision making to CI-TP in class: In the Perspective of Teaching Potential Transformation

By Prof Zhang Weiping

Date: Mon 4th September 2017

Time: 3.30 pm to 4.30 pm

Venue: MME Journal Rm (NIE7-3-16)

Weiping will talk about her research study that investigates the relationship between teachers and the teaching potential transformation. She has identified the factors of influence on teachers' in-the-moment decision making to turning points of critical incident, focusing on critical incidents in class during the process of teaching practice. These factors of influence have two dimensions: explicit and implicit. Using these factors, she then worked with seven participants (1 primary, 6 pre-service) through a workshop over a period of six months for data collection.

Prof Zhang Weiping is from Mathematics & Science School, Shanghai Normal University.

All are welcome!
