

MME SEMINAR 2019

Session 2

Date: Thur 1st August 2019
Time: 9.30 am to 10.30 am
Venue: MME Journal Rm (NIE7-3-16)

Dialogue With AST's Outstanding Educator-in-Residence, Mr Lu Yu-Jen

The OEIR Programme by AST brings in outstanding educators to Singapore for a short work attachment of two to three weeks, to provide a platform for collaborative learning among international and local educators, and to deepen our Singapore teachers' skills and knowledge.

Mr Lu Yu-Jen is currently the superintendent for curriculum and instruction at Yilan County Teacher Training Centre, Taiwan. Prior to that, he was a mathematics Lead Teacher for ten years and the director of school academic affairs and general affairs for three years. As a mathematics teacher leader and a superintendent, Yu-Jen regularly conducts professional development for primary school teachers that include the use of mathematics magic, picture books, learning trails, diagnostic instruction design and assessment task to maximise students' mathematical learning. At the international level, he has presented papers at the International Group for the Psychology of Mathematics Education Conference in Brazil and Canada, and conducted lesson demonstrations in mathematics teaching symposiums for elementary school teachers in China.

Yu-Jen was the recipient of the outstanding teacher award in Yilan County in 2015, and also received both the distinguished honour and gold medal of the excellence in teaching award in 2012. He specialises in the hypothetical learning trajectory model which emphasises on sequencing content and learning, and will be able to share with our mathematics teachers on how the design of mathematical instruction can enhance teaching and learning in the mathematics classroom.

All are welcome!
