

Working Session 1: Textbook signatures: Exploration and analysis of mathematics textbooks worldwide

Dear participants of PME 41,

We warmly welcome you to join us for this Working Session which will be held on Wed and Fri. One of the main goals of this working session (WS) is to provide interested researchers to collaborate and work on textbook analyses using our notion of textbook signatures. We are inviting participants of this WS to carry out a textbook analysis focusing on the introduction of gradient for their own country. Therefore, we would like to request that you bring along a copy of the textbook or chapter (can be hard copy or digital copy) in which the concept of gradient is introduced for the first time in your country.

Thank you.

Best regards,

Angel, Ban Heng, and Mi Yeon
