**Knowledge** refers to the ability to recall specific mathematical facts, concept, rule or formula, and to perform straightforward computations.

**Comprehension** refers to the ability to interpret data and use a mathematical concept, rule or formula in an essentially familiar situation.

**Application** refers to the ability to analyse data and/or to apply a mathematical concept, rule or formula in a complex situation or to an unfamiliar problem.

**Higher order questions** are questions that given students the opportunity to think and reflect about what they know.
